CAREER GLITCH · SHORT · SIMPLE · NO BORING PARTS

E-COMMERCE MANAGER IN THE AI ERA

Online stores never close, and somebody has to run the machine: listings, ads, inventory, reviews, repeat.

★ TL;DR — Median around $75K, remote, no credentials, learnable in 1–6 months. The catch: platform rules and ad costs change under you constantly — this job is adaptation as a service. ★

THE CAREER GLITCH TAKE

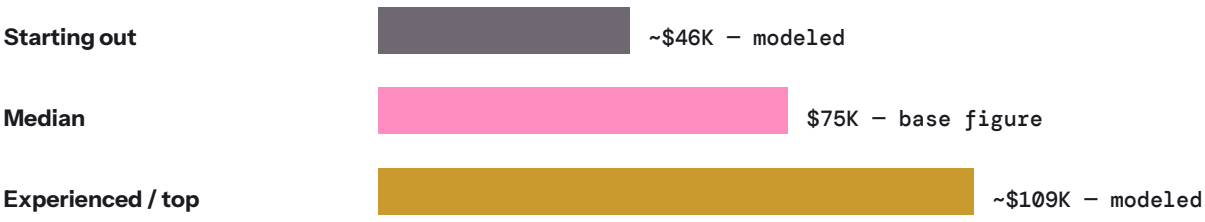

OUR TAKE: YES — WITH EYES OPEN

MEDIAN ~$75K · TRAINING 1-6 months · AI RISK MEDIUM

- E-commerce managers run stores on Shopify/Amazon: listings, pricing, promotions, ads coordination, customer metrics.
- It's a generalist-operator job inside one business — breadth beats depth here.
- AI writes listings and answers customers; merchandising judgment and unit economics stay human.

The site's take, built from this profession's numbers in the Career Glitch base.

THE MONEY — LOOK AT THE BARS

The Career Glitch base figure for E-commerce Manager is a ~$75K median (compiled from U.S. Bureau of Labor Statistics, Occupational Outlook Handbook ranges). The starting and top bars are modeled around that median — orientation, not a promise. Pay swings hard by state, employer and experience: check live postings in your state before planning around any number.

WHAT DOES A E-COMMERCE MANAGER ACTUALLY DO?

✓ Maintain product listings: photos, copy, pricing, variants, SEO

- ✓ Coordinate promotions, launches and ad campaigns
- ✓ Watch inventory signals and bestseller data; brief restocks
- ✓ Analyze conversion and repeat-purchase metrics and act on them

Think: the manager of a shop that's open in every timezone at once — the floor is a dashboard and the customers never knock.

WHAT AI ALREADY TOOK (AND WHAT IT CAN'T)

THE ROBOT	THE HUMAN
AI drafts product copy, generates listing images, answers routine customer questions and forecasts demand. Listing-production work is largely automated.	Merchandising: what to feature, bundle, discount or kill. Reading a store's numbers as a story about customers — and acting before the trend is obvious — stays human.

⚠ **Every store's stack differs; your value is the transferable core (conversion, retention, unit economics), not one platform's buttons.**

THE VIBE — IS THIS YOUR LIFE?

THE JOB IS	THE JOB IS NOT
✓ Remote roles across every product category ✓ Direct, visible impact on revenue ✓ A natural runway to running your own store	✗ Sale seasons are your crunch seasons ✗ Ad costs and platform policies whipsaw your plans ✗ You're accountable for numbers you only partly control

Good fit? You're commercially minded, comfortable in dashboards, and you like the mix of creative (listings) and numerical (margins).
Bad fit? You want deep specialization or a slow, stable routine — stores mutate weekly.

THE FORK — PICK ONE DOOR

DOOR A — RUN A SMALL STORE (YOURS OR THEIRS)	DOOR B — AGENCY / BRAND COORDINATOR
The fastest credential is a live store: start a small one or manage a local brand's. Real revenue data, however modest, out-argues every course certificate in interviews.	Enter as an e-commerce coordinator at an agency or brand: listings, promos and reporting under a manager. Volume across several stores compresses the learning curve.

Smart move: Learn retention, not just acquisition: email/SMS flows and repeat purchase are where store profits actually live, and few junior candidates can talk about them.

Where you land after: Senior e-commerce manager → head of e-commerce / DTC lead, or your own brand with the operator skills already paid for.

YOUR ROADMAP — 6 STEPS

1	2	3	4	5	6
PLATFORM CORE	LISTING CRAFT	MONEY METRICS	A LIVE	GROWTH CHANNELS	OPERATE AND

STEP 1 — Platform core

FREE · WEEKS 1-3

- Shopify end-to-end: products, collections, discounts, checkout, basic theme edits.
- Marketplace basics (Amazon/Etsy) so you understand both worlds.

STEP 2 — Listing craft

FREE · WEEKS 3-6

- Titles, images, descriptions and reviews systems that convert.
- Rewrite 10 weak listings from real stores as portfolio samples.

STEP 3 — Money metrics

FREE · MONTHS 1-2

- Conversion rate, average order value, margin, CAC vs LTV — compute them in your sleep.
- Build a simple weekly store dashboard you'd actually run a business from.

STEP 4 — A live store

MONTHS 2-4

- Yours or a client's: real products, real promotions calendar, real numbers.
- Document a launch and a promotion with before/after results.

STEP 5 — Growth channels

MONTHS 3-5

- Email/SMS flows, store SEO, and how paid ads feed a store.
- Set up the core retention flows; measure repeat purchase change.

STEP 6 — Operate and present

MONTHS 4-6

- Run the store rhythm: weekly trading meeting with yourself, actions logged.
- Package your results into case studies for roles or clients.

FIRST 90 DAYS — JUST DO THIS

□ Today: build a demo store on a free trial and list three products properly.

□ Days 1–30: platform fluent; listing rewrites portfolio done; money metrics computed on sample data.

□ Days 31–60: live store (yours or a client's) trading; first promotion run and measured.

□ Days 61–90: retention flows live; weekly dashboard habit; case study drafted from real numbers.

□ Day 90: a store you've actually operated and results you can show — the entire pitch.

NEXT — MAKE IT PERSONAL
